REPLY BRIEF UNDER 37 C.F.R. § 41.41

Sir:

The present paper represents a Reply Brief in response to an Office Action mailed on October 20, 2004 for the above-identified Appeal. Although the Office Action appears to set a response time of January 20, 2005, we are treating the October 20, 2004 Office Action as an Examiner's Answer under the new rules (i.e., 37 C.F.R. § 41.41), response to which is due by December 20, 2004. The Board is respectfully requested to consider this Reply Brief directed to new grounds of rejection raised in the Examiner's Answer.

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to Mail Stop Appeal Brief - Patents, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450 on December 20, 2004.

I. REAL PARTY IN INTEREST

Stockhausen GmbH & Co. KG is the Assignee of the entire right, title, and interest to the above-identified application and, as such, is the real party in interest in this Appeal.

II. RELATED APPEALS AND INTERFERENCES

There are no other appeals or interferences known to the Appellant, the Appellant's legal representative, or the Assignee of the above-identified application which will directly affect or be directly affected by or have a bearing on the Board's decision in the pending Appeal.

III. STATUS OF CLAIMS

Claims 1-34, 37 and 51-60 have been canceled.

Claims 35, 36, 38-50 and 61-64 are pending.

Claims 1-2 (believed to be claims 35-36) stand rejected under 35 U.S.C. § 102(e) for anticipation by newly cited U.S. Patent No. 5,384,179 to Roe et al. (hereinafter "the Roe patent").

Claims 35, 36, 39, 41-45 and 47-49 stand rejected under 35 U.S.C. § 103(a) for obviousness over previously cited U.S. Patent No. 4,076,663 to Masuda et al. (hereinafter "the Masuda patent") in view of the Roe patent.

It appears that the Examiner has forgotten to include his reasons for rejecting claims 46, 50 and 61-64 in the Office Action.

The Examiner has now included claim 38 along with claims 40 and 41 as containing allowable subject matter and, therefore, these claims would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 35, 36, 39, 41-50 and 61-64 are at issue in this Appeal.

Claims 35, 36, 38-50 and 61-64 are reproduced in Appendix A which is attached hereto.

APPENDIX A

1-34. (Canceled)

① 35. (Previously Presented) A substrate comprising a super-absorbent material applied to the substrate, wherein the super-absorbent material is obtained by allowing suitable monomers to polymerize in the presence of a catalyst in order to obtain a pre-cross-linked polymer solution, adding a cross-linking agent containing two functional groups which are capable after thermal excitation of reacting within at least ten minutes with carboxylate or carbonic acid functional groups to the polymer solution to obtain a pasty composition, subsequently applying the composition on or in the substrate and allowing the applied composition to dry for one to three minutes at between 150°C and 200°C to form a swellable paste, and wherein the pasty composition is applied to the substrate in the form of discrete, substantially semi-spherical islets having a diameter of 10 μ to 1000 μ .

② 36. (Previously Presented) A substrate comprising a super-absorbent material applied to the substrate, wherein the material has a significantly enlarged surface area achieved by having the super-absorbent material in the form of a plurality of discrete, substantially semi-spherical islets with a diameter between 10 and 1000 μ .

37. (Canceled)

③ 38. (Previously Presented) The substrate as claimed in claim 35, wherein the super-absorbent material is a foam.

④ 39. (Previously Presented) The substrate as claimed in claim 35, wherein the pasty composition applied to the substrate is allowed to dry and cross-link.

⑤ 40. (Previously Presented) The substrate as claimed in claim 39, further comprising adding a foaming agent to the pasty composition prior to applying the
